## Introduction

This tutorial will guide you through the first steps for using KoboToolbox, from creating an account, generating a form with different types of questions, collecting data online and offline, exporting and visualizing data.

## What is Kobotoolbox?

[KoboToolbox](#) is an open source platform for the collection, management, and visualization of data. As the most widely used primary data collection tool in the nonprofit sector, it is the tool of choice for over 14,000 social impact organizations worldwide.

## Kobotoolbox features

- Build questionnaires in the web or using XLSForm
- Translate questionnaires into multiple languages
- Create a questions library
- Collect data offline or online in multiple devices (mobile phones, tablets, laptops)

- Visualize data in maps and reports
- Download data in multiple formats (XLS, CSV, KML, ZIP, GeoJSON)
- Share and collaborate on projects

## Getting started in KoboToolbox

### 1. Create an account

1. Go to <https://www.kobotoolbox.org/sign-up/>
2. Select 'Global KoboToolbox Server'
3. Enter the required information in the form and click on create account.

**Create an account**

**KoboToolbox**  
Global Server

High quality data collection tools for social impact organizations working in challenging environments.

For organizations that prefer data hosting in the European Union, please create an account on the EU-based server.

Get started by creating a free account on our Community Plan, which includes unlimited projects, unlimited data collectors and collaborators, 5,000 submissions per month, and 1GB of file storage.

For more data collection, file storage, and features, get in touch to upgrade your plan.

Full name \*      Organization \*

## My Projects Dashboard

In the My Projects View you will find all your projects listed. You can see on the left side a list of the Status of your projects just below the 'New' button. On the upper right you will find three options to apply to your projects: archive, share or delete.

**KoboToolbox** Search...

**New project Button**

**Project Options**

**My Projects** filter fields

**Projects by Status**

- Deployed 2
- Draft 0
- Archived 0

Project name	Status	Owner	Date modified	Date deployed	Submissions
<input type="checkbox"/> Who are we?	deployed	me	October 25, 2023	October 25, 2023	3
<input type="checkbox"/> Field collection	deployed	me	April 11, 2023	February 22, 2023	4

**Projects List**

## Creating a new questionnaire

1. Login to your account (see step 2 on [previous section](#))
2. On the *My Projects* view, click on New 
3. Select the option Build from scratch

Create project: Choose a source

Choose one of the options below to continue. You will be prompted to enter name and other details in further steps.

  
Build from scratch

  
Use a template

  
Upload an XLSForm

  
Import an XLSForm via URL

4. Enter a title for your project, along with a sector and a country. Then click on **Create Project**.

Create project: Project details

Project Name (required)  
Enter title of project here **Your project title here**

Description  
Enter short description here **A description for your project here**

Sector (required)  
Select... ▼

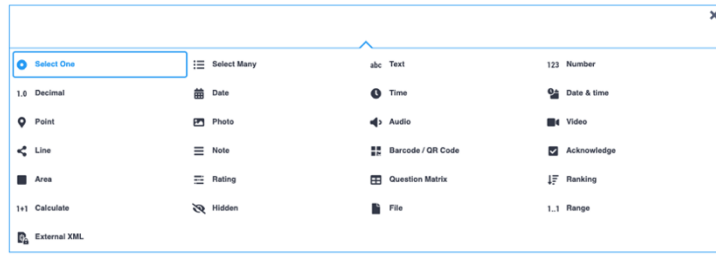

Country (required)  
Select... ▼

BACK

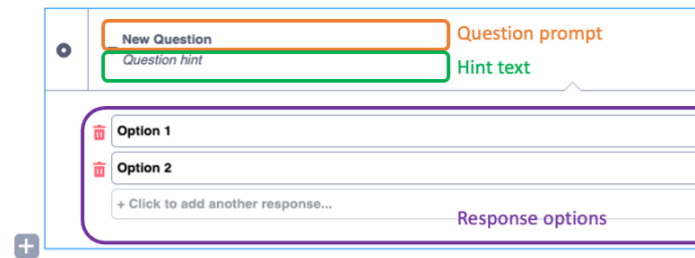

**CREATE PROJECT**

5. Start adding new questions by clicking on the  button and then Add a question.

- We are going to add a **Select One** type question by clicking over the first option.

- In the new question, you will have a space to add the question prompt, a hint on how to re-

spond and a list of options to respond the question.

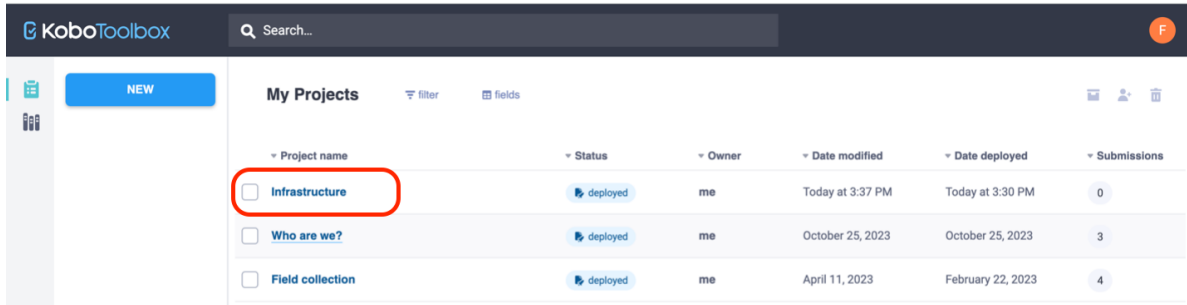

- Once you are done creating questions, you can click on  button located on the upper right corner of the screen.

- Click on the **Return to list**  button located on the upper left corner to go back to the dashboard

## Deploying and sharing a questionnaire

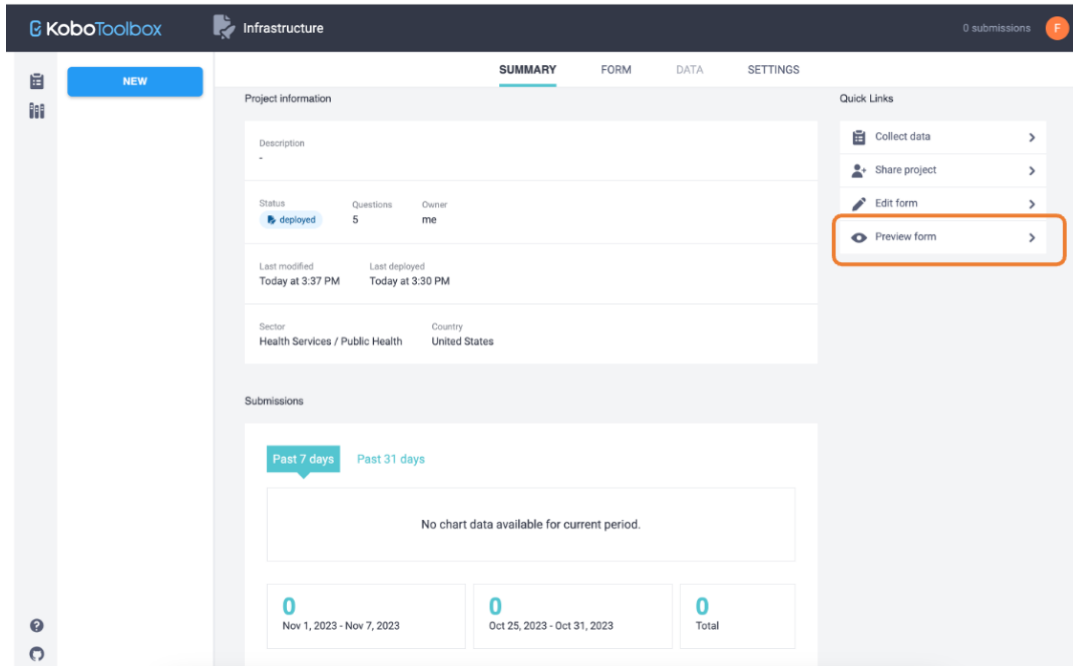

- Preview your questionnaire:

Once you are done creating the questionnaire, you might like to preview it. To do so, click on the name of your project on the list in the dashboard.

You will see a summary of the project, displaying the description, the project status, number of questions, the owner, last time modified and deployed. Also, on the bottom of the page you will see a chart and statistics of the submissions.

To preview your questionnaire, click on **Preview form** on the Quick Links menu on the right of the screen.

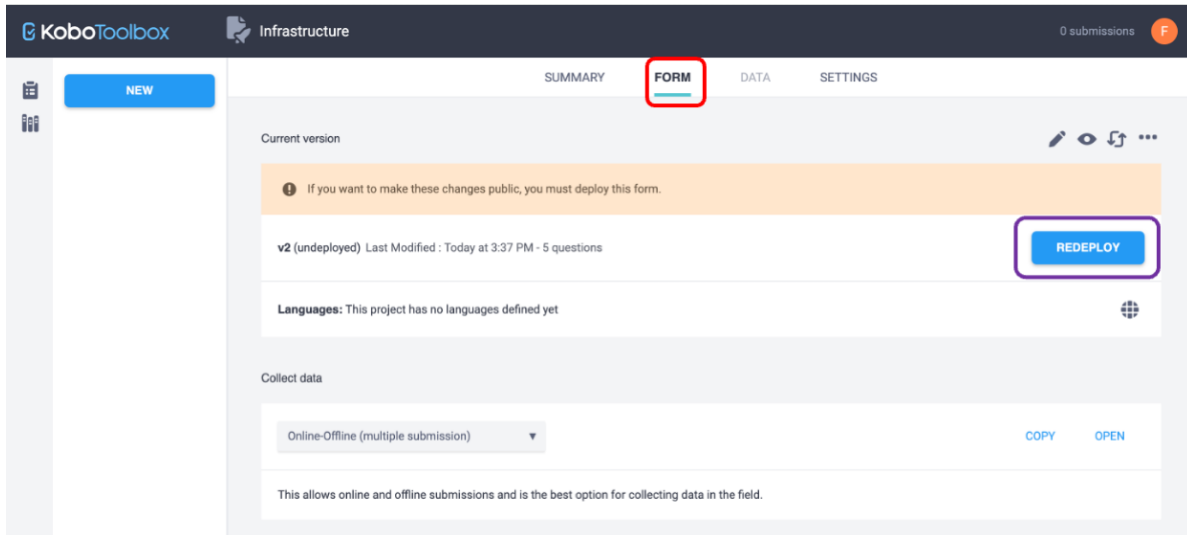

A temporary popup windows will show a complete functional version of the form. You can fill up the questions, but the responses will not be loaded to your project.

## 2. Deploy the questionnaire

Deploying your form is needed to make it available to the public, or to those who will be filling the form in the field.

To deploy the form, click on **FORM** menu on the top of the screen, next to **SUMMARY**. Then, click on the **DEPLOY** (or **REDEPLOY** if you made changes to the form) button.

Remember to redeploy your form each time you made changes to the questions in order to see them in the form you are sharing.

### 3. Preparing the for before data collection

Before starting to collect data, you will want to set up the mode of collection. In the same window **FORM**, under the section **Collect data** you will see a drop-down menu with multiple options. Select the one that best adapts to the type of collection you will be doing. In this case, we will set it on **Online-Offline (multiple submissions)** as we want to collect data without being connected to the internet.

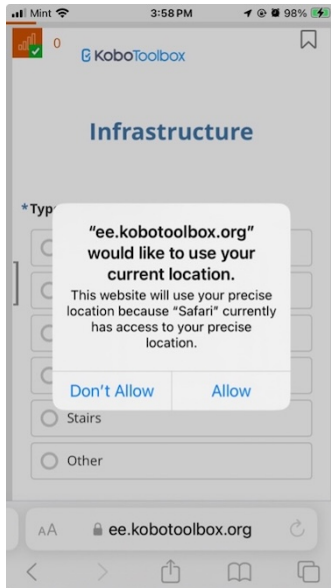

Now, to start collecting the data you can simply click on the **COPY** button to copy the URL of your form. You can share this url with the people that will be adding entries to the form.

Or you can click on **OPEN** to open the form from the browser on the device you are using.

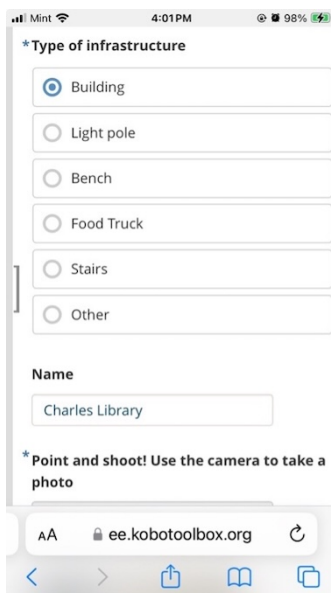

### Collecting data on a mobile device

1. Once you open the URL of the form, if the form includes a location question, you will see a message asking to provide access to location services. Be sure to **allow access** if you want to be able to use the location of your phone in the form.

2. Fill out the questions as needed.

3. If there is a location question on the form. Click on the record the current location icon.

Record your current location

latitude (x,y °)  
39.98245

longitude (x,y °)  
-75.155464

altitude (m)  
38.4125137329101

accuracy (m)  
26.4287705695430

Save Draft

ee.kobotoolbox.org

- Once you are done filling the questions, and you get to the bottom of the form, click on **Submit form**.

-75.155464

## Collecting data offline

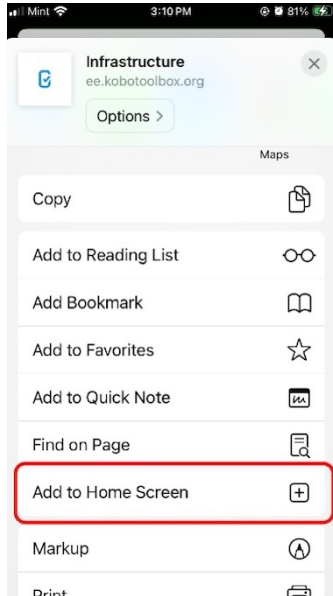

**Before** going to the field or while you are **still online**, be sure to follow these steps:

- Open the form using the URL when you are still online.

2. To bookmark the form, if you are using an iPhone, click on the **Share** option

3. Click on **Add to home screen**.

4. You will see an icon created on your home screen with the name of your form

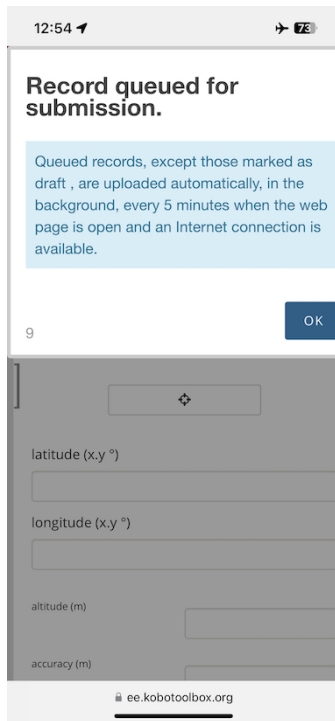

Warning! Do not clear your internet browser history if you are collecting data offline.

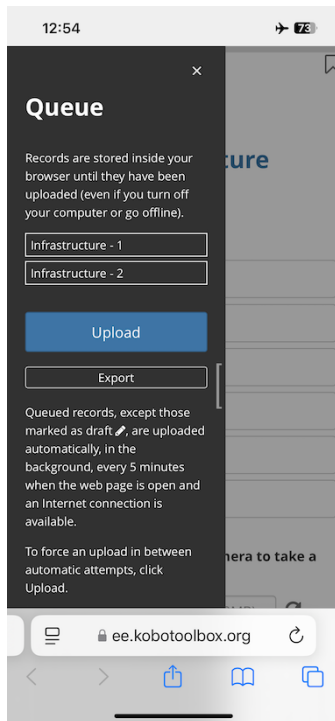

Well done! Always use the homescreen shortcut you just created to open the form.

5. Fill out the form as needed and then click on the **Submit** button.

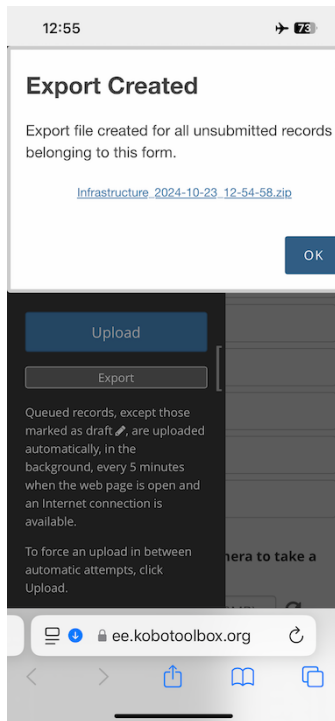

6. Since you are offline, you will see a message **Record queued for submission**.

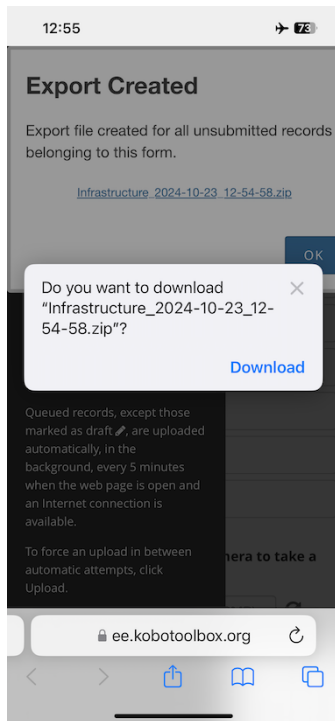

7. All data you fill and submit in the form while offline will be stored in your browser cache and remain in queue until you are back online.
8. You can see the queued records by clicking on the left edge of the screen. This will open a side panel like the one below, listing all records waiting to be uploaded.

9. Once you are back online, simply click on the **Upload** button. Although the form will try to upload every 5 minutes, it is a good practice to check the queued panel to be sure all records have been uploaded.
10. Alternatively, if you think you will not have connection soon and fear losing your records, you can export the data and save it in your phone as a ZIP file.

11. To do so, simply click on the **Export** button on the queued panel and then click **OK** when the file is created.

12. Then click on **Download** and your ZIP file will be saved in you device. This file contains a .xml file with every record.
